MMC Employees Recognize Each Other With Moment to Shine

Gregory Ross has received an award from Teri Young for Patient Centered
Greg went above and beyond as he worked to support our clinicians and the patients they care for when we suddenly were without support and access to our external transcription vendor ... Greg stepped in immediately in his very quiet and efficient way to look at solutions, find ways to access transcriptions that were “caught” in the middle of the systems and ensure that the information was available to our clinicians in support of our patients.

Jennifer Verrecchia has received an award from Audrey Davis for Excellence
Jennifer has done a great job stepping up and training ED techs and nurses on the art of phlebotomy. Jen is a great asset and her many years of experience have allowed her to succeed in this endeavor.

Heather Combes has received an award from Patricia Andrews for Ownership
Thank you for leading your team during the recent Nuance issue. You quickly adjusted processes and schedules to ensure patient care was not negatively affected.

Rosa Batty has received an award from Levern Kelley for Integrity
Coming in on a later shift, asking another co-worker if she could take their place at the drawing station so that person could have a break.

Lee Hallagan, Joseph Rappold and Kristen Sihler received an award from Corey Matheson for Respect
I cannot thank this group enough for their tremendous patience and respect while guiding the rest of the clinicians in the care of a profoundly sick patient. I am proud to be a part of such an amazing team.

Danielle Dwinal has received an award from Kim Booth for Innovation
Danielle teamed up with Linda Mondor to work with Maine Health Business Standardization to scan in results from reference labs. Hours of manual typing turned into a five minute scan. It is estimated to save 15 hours per week in the referral lab. This shows innovation in workplace process.
