When You Support United Way, We All Benefit

A Message from Bill Caron, President MaineHealth

Dear Colleagues,

I am writing to you as the 2015 United Way Campaign gets underway. Across MaineHealth, we care deeply about improving the quality of life for people in our community, no matter where they receive their healthcare and no matter what their circumstances. Participating in this year’s United Way fundraising campaign is one way our employees can help create real change in our community and join colleagues across MaineHealth to make a difference.

When you support United Way, we all benefit. Our youth are better educated. Our neighbors are more financially stable. Our community is healthier. Your support makes a difference and is vitally important. It takes all of us.

This year, several MaineHealth member organizations are joining forces to achieve a goal of $300,000 in donations for the United Way of Greater Portland. Participating members include Maine Medical Center, Maine Medical Partners, HomeHealth Visiting Nurses, NorDx, and the MaineHealth corporate office by focusing on the value that just one dollar delivers to members of our community.

One dollar a week provides:

- Up to three safe, reliable rides for seniors to attend medical appointments
- Two mental health counseling appointments to help someone in need
- A week of afterschool activities for an elementary student
- 24 meals at Preble Street
- About 247 pounds of food for a hungry family from Wayside Food Rescue
- 11 hours of programming at the Boys and Girls Clubs

One of the reasons I give to United Way is because I want to know that every dollar I give is making the biggest possible impact for individuals and for our entire community. I hope you will join me in giving to United Way at the level that’s right for you.

Sincerely,

Bill Caron
